PROFILE

CMRP & PMP-certified engineer leading the Engineering Support and After-Sales team at Camel Step, with expertise in Loring and Probat coffee roasters, espresso machines, grinders, and brewers. Skilled in preventive, predictive, and corrective maintenance, commissioning, after-sales service, and reliability optimization.

PROFESSIONAL EXPERIENCE

Lead, Engineering Support 08/2026 – Present
Camel Step Riyadh

- Lead the Engineering Support and After-Sales team (10+), overseeing technical service, installations, maintenance operations, and customer support; manage around 1,000 maintenance requests per year.
- Leading the development of a maintenance management platform (in progress) covering service tickets, preventive maintenance, asset tracking, warranty parts, checklists, and performance dashboards.
- Standardized service workflows through technical checklists, visit reports, escalation procedures, KPIs, and customer communication processes.
- Developed maintenance contract costing models, service packages, and SLAs based on labor, spare parts, travel, scheduled visits, and emergency support.
- Coordinated equipment commissioning, technical events, supplier support, and complex troubleshooting while developing training and onboarding resources for technicians.

Maintenance & Commissioning Engineer – (CMRP Certified) 07/2024 – 08/2026
Camel Step Riyadh

- Served as deputy team lead before being appointed lead in August 2026.
- Implemented a proactive preventive maintenance program for espresso machines, grinders, brewers, and roasters to reduce equipment downtime.
- Installed and commissioned 30+ Loring and Probat coffee roasters at company sites and for customers who purchased them, overseeing calibration and operator training for faster production readiness, and provided their preventive and corrective maintenance.
- Led troubleshooting of complex mechanical and electrical issues and improved service response times.
- Optimized a spare parts inventory of about 2,000 items, reducing procurement delays and maintenance costs.
- Delivered technical training to 10+ technicians and baristas, improving first-line troubleshooting efficiency and reducing external service calls.
- Enhanced equipment reliability by conducting root cause analysis on recurring failures and recommending targeted upgrades.

Electrical Engineer | Site Engineer 08/2021 – 07/2024
Sadu Najd Engineering Consultancy Company Riyadh

- Directed electrical works for multiple high-value private residential projects, keeping to delivery schedules.
- Standardized shop drawing reviews, reducing revision cycles and improving documentation accuracy.
- Facilitated cross-department coordination (MEP), resolving design conflicts before implementation.
- Mentored junior engineers and site teams, improving productivity and reducing on-site errors.

CERTIFICATES
